DIRECTORY

The need becomes apparent to create a numberical input feild to refference (a) signature ID.

This is to become functional when integrating a item to fit the dimensions and out put ability provided use of calculable location source and resource.

It is important to annote the location origin and total mechanical radius of the Label.

Becoming a unit of numerical reffernce and compatible with Data signature.

The security can become a bio - identifying tool when reference to a person in total of tissue or fuids the intake of water andf the uses of fuels and food can become a reference to the animal captivity.

To use hardware and complete a soft - input field is ideal when the objective is to make use of the data in a informational infference.

Special notes are taken when using Bio - Sphereical or Cellulose active measures to refference a control.

Work - permits are now considered calculable dependant a person continues a body temerature of 98 degrees and a Rule can be constructed for an intergrated transfer of energy and tasks preformed can be considered a working errand.

This would be inportant when taking images of a surface or volume of area although with no refference to biological functions or pathology there would be no 'Functional" errand.

INSURANCES

When making refference to a(n) item in the list of inventories the total in accordance with trade sequences and transfers of Bio - Logy and a Profferable outcome.

Art and Craft is now under a new interpretation when a Numerical and Control is defined.

Structures and Inventory totals can be used for re purpose.

Refferences and educational material.
